

PXM Software Solutions

Simple Solutions for Complex Problems

We help small and midsize businesses improve operations through existing or custom software, business automation, artificial intelligence, web modernization, consulting, and ongoing software support. Our focus is organizations that have outgrown manual processes, disconnected systems, aging software, or technology that no longer supports the way they operate.

Core Capabilities

- 1. Custom Software Development**
Business applications designed around specific workflows, requirements, and operational needs.
- 2. Business Automation & AI Integration**
Practical automation and AI solutions that reduce repetitive work, improve efficiency, and support better decision making.
- 3. Software Consulting**
Technical guidance for new systems, modernization initiatives, software planning, and complex technology challenges.
- 4. Website Design & Modernization**
Modern, professional websites built for usability, performance, optimized for AI Search and SEO.
- 5. Software Maintenance & Support**
Ongoing support, troubleshooting, enhancements, and modernization of existing business software.

What Sets Us Apart

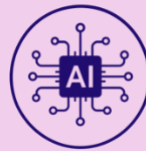

We begin with the business problem, not the technology. Our goal is to understand how an organization operates, identify where friction exists, and create practical solutions that fit the business rather than forcing the business into a generic platform. With more than two decades of software development experience, PXM Software Solutions combines technical expertise with a strong focus on real world business operations.

Featured SaaS Solutions

WalterCRM / WalterSuiteOS

WalterCRM supports customer and business workflows, while Walter SuiteOS is being developed as its next generation expansion into a broader business operations platform.

QuolexIQ

An AI platform being developed to help businesses move beyond simply interacting with AI and toward using coordinated AI capabilities as part of everyday business operations.
